

Why is the country better than the city?

I believe that the country is definitely better than the city.

Firstly there is more space in the country. In the country people have farms. Farms have lots of space that you can use. The space can be used for riding motor bikes or riding horses. We can also use the space for animals like sheep, cows and goats.

Secondly, it is safer in the country than the city. It is safer because there is less traffic on the roads which means we can always cross the road safely. It also means that there are less crashes on the roads. If there was an earthquake it would be safer in the country because you wouldn't get hit by falling buildings. In the city there are lots of burglars who might rob your house or take your stuff if you are walking down the street.

Finally the country is better than the city because it is cleaner, prettier and quieter. In the city lots of people litter so there is rubbish everywhere. It is

quieter in the country because there isn't as much traffic or loud police or fire sirens. It is prettier in the country because in the city they don't have lots of trees, flowers and animals.

So that is why I strongly believe that the country is better than the city.
